JumpStart® SRM in *only* 6 Weeks!

A well-connected firm 'relationship management' is not only about customer relationships; it's about supplier relationships as well. Well-managed supplier relationships can be powerfully leveraged to improve an organization's value chain and overall profitability.

The goal of an effective and efficient SRM system is to reduce costs through collaboration. With SEAL's JumpStart® package and proven methodology you can sustain a collaborative environment that results in increased quality and productivity, faster cycle times, and greater efficiency — *all in six weeks!* It is understood that SRM tools were developed to reduce the TCO for produced goods, while creating a competitive advantage for an organization through deeper relationships with its suppliers. The only problem was it took a very long time to reach this goal. But, with SEAL's JumpStart® package, you can streamline your procurement processes to fit your demand chain in only 6 weeks!

SEAL's JumpStart® Package can make *it all* happen in ONLY 6 weeks!
